

GYSPOT ARCPULL 200 is a drawn arc welding product developed specifically for thin car body sheet metal. Its innovative gun is equipped with a high precision linear motor with digital control, which provides refined synergies.

DRAWN ARC : A PROFESSIONAL PROCESS

For Aluminum Dent-Pulling, drawn arc welding has several advantages as compared to capacitor discharge technology:

- Gas protection which prevents contamination of the weld
- Deep repair capabilities
- Closer Key fitment for stronger pulling capabilities
- Reduction in post repair preparation
- Excellent Reproduction and reliability process
- No impact on the reverse side of the repaired panel.

GROUND BREAKING INNOVATION

The gun is equipped with a linear motor which is superior and unique in the market. Unprecedented advantages:

- Superior control of the welding cycle.
- Digital process control - no need for manual adjustments.
- 2 independently adjustable ground electrodes for better stability during the welding process.

2 WELDING MODES

A digital interface provides intuitive and functional navigation between the welding modes:

- A synergic mode which provides factory preset programs for fast and easy settings.
- A manual mode for users who require complete control - this provides personalized settings for specific use.

Included :

- Automatic gun with 2 Ground Electrodes
- Aluminum Keys consumables box 0.05".
- Lifting rod

Ref. 057470

Welds aluminum and steel studs:

- Steel studs up to Ø 0.23".
- Aluminum studs up to Ø 0.23".
