

Powered exclusively by compressed air, the ERGO LIFT 1000 ROLL can lift and manoeuvre vehicles of up to 2.5 tonnes. With 4 support arms that swivel and lock automatically, it can be adapted to suit all chassis types. Ergonomically designed, it has a lifting height of around 1 m, so you can work upright around the vehicle to avoid fatigue.

- Super-compact: 10 cm in minimum position on the ground.
- Conforms to standard EN 1493 (load reversibility).
- Extremely useful in workshops with limited space.
- Mobile, can be manoeuvred easily with 4 wheels.

Work from a standing position to help prevent musculoskeletal injuries (MSDs).

Handle to position the support arms with an **automatic locking system** (with or without load).

Adjustable sliding skid on the support arms to leave the underbody accessible.

Hydraulic safety system with **automatic scissor lock** in the event of hose rupture.

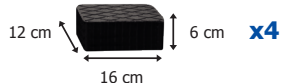

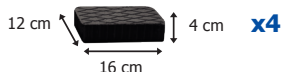

Maintenance-free, detachable hydropneumatic pump.

All axles are fitted with bronze bushes with a **self-lubricating coating**, which require no maintenance.

Supplied with 8 rubber pads

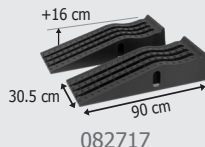

4 large attachable wheels can be used to transform the lift into a mobile carriage, enabling the vehicle to be manoeuvred easily around the workshop.

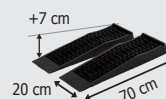

Optional accessories

4 SUV skates
